

Boat Ramp Upgrade October to December 2018

The City has been successful in attracting funding from the Recreational Facilities Boating Scheme (RBFS).

As a result the construction of a new boat ramp will commence in October 2018 and is expected to take about 12 weeks to complete.

Upgrades include:

- An improved approach ramp to allow vehicles and trailers to better line up with lanes.
- Two lanes; one dedicated to launching and one to retrieval.
- A finger jetty to allow three boats at any one time to be berthed on either side.
- Additional rock revetment installed south of the boat ramp.

The boat ramp will be unavailable over the construction period.

The nearest alternative facility is available at Deep Water Point.
