

## Street Tree Species Guide

**Botanical Name:** *Eucalyptus cladocalyx*

**Common Name:** Sugar gum

**Origin:** South Australia

**Description:** A tall tree to 35m without a lignotuber but has epicormics buds up the stem. The old bark is mottled white and grey with some variation ranging from pinky orange. It has distinct barrel shaped fruit sometimes with longitudinal ribbing and yellowy white flowers that appear in summer.

**Top right:** The white-grey mottled older bark of the *Eucalyptus cladocalyx* which becomes yellowy brown after shedding
