

Street Tree Species Guide

Botanical Name:

Liquidambar styraciflua

Common Name: Liquidambar

Origin: North America

Description: Liquidambar is a deciduous tree with dark green foliage turning yellow and then to burgundy red in autumn prior to dropping. The leaf lobes are rounded rather than pointed as with the standard Liquidambar.

Right: Full form of the *Liquidambar styraciflua*

Below: Fruit of the *Liquidambar styraciflua* that forms following maturity at approximately 20-30 years old
