

COMMUNITY & BUSINESS PERCEPTIONS & COMMUNITY WELLBEING SCORECARD 2018

With a vision of 'Working together, to achieve community wellbeing, for today and tomorrow' the City of Melville commissions an external research organisation every two years to obtain and track our community's satisfaction and wellbeing over time.

The survey results are core indicators for the City to measure our performance in terms of how well we are delivering on our vision.

The surveys have two purposes:

1. The Community Wellbeing Survey measures the current state of the City's six key outcome areas, identified by the community as their aspirations and essential to their individual wellbeing. These outcome areas are:

- Safe and Secure
- Clean and Green
- Sustainable Connected Transport

- Sense of Community
- Healthy Lifestyles
- Growth and Prosperity

2. The Markyt Community Perceptions Survey and the Markyt Business Perceptions Survey asks ratepayers, residents and the business community about their perceptions of the City's services, infrastructure and facilities, which are provided to support and improve community outcomes. As many products and services are common between Local Governments, this survey also allows the City to benchmark its services across the local government sector.

These surveys help inform future plans and business planning, and with a large community and competing demands, these results help us prioritise resource allocation.

Thank you to everyone who participated in these surveys.

Outcome areas	Source		Re		(unles	s stated	l, % of to	otal resp	bonden	resider ts who r ith state	ated	sinesse	es	
		2018	2017	2016	2015	2014	2013	2012	2011	2010	2009	2007	2006	2005
