

John Dickenson Reserve Playground Renewal

ENGAGEMENT RESULTS STAGE 2

Following an extremely close initial voting outcome, the City undertook a short, targeted re-engagement to confirm community preference prior to proceeding to procurement. Option 3 was removed from the second stage due to minimal support in the initial vote, and the community was asked to indicate a preference for either a consolidated or separated play area layout. This consultation was open from 17–23 December and delivered at the consult level.

The opportunity to vote was communicated via a direct email to residents within a 400-metre radius of the reserve. A total of **33 community members submitted votes**, with **Option 4** identified as the preferred playground equipment.

As a result of the extended engagement period, construction is now planned for **April 2025**, with Option 4 and a natural colour palette confirmed.
