the day

\$5

Come along to learn how you can save money!

A fully electric household costs about half
the running costs of a fossil fuel home.

6 Decisions to make to become fully electric!

- Gas Hot water → Heat Pump Hot Water
- Gas Cooktop → Induction Cooktop
- Gas Heating → Reverse Cycle Airconditioning
- Petrol Vehicle → Electric Vehicle
- Grid Electricity → Solar
- Grid Electricity → Home Battery

Tradies and installers will be there to answer your questions and a range of electric vehicles will be on display. If you have been thinking of switching over to electric, here is an opportunity to learn more and ask questions.

Key Note Speaker

Professor Jatin Kala, from Murdoch University will speak on the urgency to take personal action to address climate change at 1:30pm

DID YOU KNOW?

Households account for 42% of Australia's emissions
