

# Harry Patterson Park

## Park and playground options

City of  
**Melville**

### ENGAGEMENT RESULTS STAGE 2

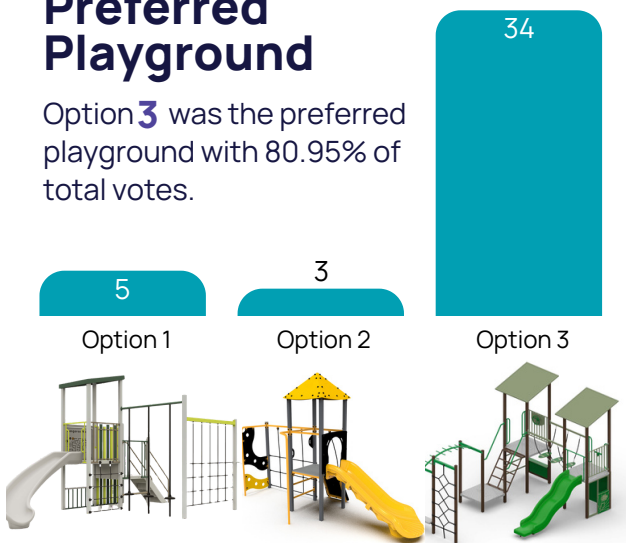

Stage 2 engagement for the Harry Patterson Park upgrades was undertaken from 24 April to 11 May 2026. Local residents and users of the park were invited to review the draft concept plan and provide feedback on their preferred playground design option.

The draft concept, informed by feedback received during Stage 1 engagement, included a new play area, upgraded basketball court, additional tree planting and pedestrian improvements. Three playground concepts were presented for community voting, including a proposed combination play unit within the existing play space and a new toddler play area on the opposite side of the park.

Feedback was collected via the City's online engagement platform, with alternative participation options available on request. Construction of the park upgrades is currently estimated to commence in October 2026.

### Preferred Playground

Option 3 was the preferred playground with 80.95% of total votes.
