

Outline of previously proposed future double tennis court - Bull Creek Tennis Club requested provision on Premier Playspace plans during public consult period 2017.

Consider possible vehicle access/ bore water trucks and service vehicles. Also parking and access for men's shed.

Proposed Men's Shed footprint of 18 x 25m. Notional only for size comparison/ discussion. Building location could be shifted around this site to accommodate other elements and traffic considerations. Footings would need to consider low lying area and high water table.

Proposed new basketball & tennis hit-up wall location as part of the Premier Playspace design. These could be smaller footprints and could be differently on site.

Proposed new basketball & tennis hit-up wall could be located more centrally if the tennis courts are not going on this site as previously thought. The men's shed and these items could be considered for design together.

Current basketball and hit-up wall to be reconverted into car parking.

These bays may be removed to allow for a connecting pedestrian path between Bob Gordon and Centennial/ John Creany.
