

Underwater Light

Acrylic Workshop with Kirsty Watkins

Spend the day painting a beautiful underwater scene filled with clear blue water, soft movement and glowing light across the sandy ocean floor.

This workshop is inspired by the view beneath the surface, where sunlight filters through the water and creates bright, dancing patterns across the sand.

You'll explore deep blue-green water, soft turquoise shallows and crisp white highlights to create a fresh underwater scene full of depth and movement.

- \$275 for day.
- All paints and materials are provided other than canvas.
- Bring an artist-quality canvas (51 x 61-cm or similar proportion)
- Suitable for all levels of expertise.
