

Moonlight Cove Proposed Swing Installation

ENGAGEMENT RESULTS

The City of Melville sought community feedback on a request to install a swing in a small grassed area at Moonlight Cove, Brentwood.

Community members were invited to share whether they supported or did not support a swing at this location, or if they were unsure. Participants were also asked about their preferred swing type if a swing were to be installed.

Engagement was conducted via the City's website from **12 to 26 February 2026** and was communicated through direct communication with nearby residents.

Results

Forty nine people participated in the consultation. Slightly more respondents did not support the proposed swing installation (55%). Of the 42 participants who indicated a swing preference, the most preferred option was a basket swing (39%).

Next steps

Based on community feedback, the City will not be progressing with a swing installation at Moonlight Cove.
