

## Feedback Summary - Removal of Tree 63 Ardross Street, Applecross

Comments	Agree	Do Not Agree
The tree has grown to a size and incline (as shown in the photo) whereby it is a danger to my property and to people using the footpath. The tree has dropped numerous large branches over the years and will drop more. This is not a flame tree it is an Indian Coral Tree	1	
The tree has dropped large branches onto the footpath and house driveway on two occasions that I have witnessed during winter. It is very dangerous and should be removed to protect people using the footpath and house	1	
There is absolutely no reasonable reason to remove this tree or any tree just because they cause mess. I would strongly reject this.		1
I have previously seen limbs down	1	
The tree is too good to cut down		1
If it's a danger to children walking to school, unfortunately it must go	1	
I agree to the removal of the tree on the verge of No.63 ardross St. Providing it cannot be made safe by cutting back dangerous branched. I appreciate it must be a worry to the owner of No.63 due to the injury and damage to the house if limbs fall also to people on the footpath	1	
Tree is good for another 20 years and for greenery. Drop branches could be chipped instread of removing the whole tree		1
Too many trees have been chopped down in this area i.e. block on corner of Ardross and Kinross 2 120 year old jarrah tress and several others were lost. Council said they would plant trees on verge along Kinross Road. None so far. A park up the road (kinross) had about 8 trees chopped down.		1
	1	
I've noticed this tree has needed very frequent pruning. A Jacaranda would be a gret substitute. P.S. Please ban fake lawn from verges	1	
If there are concerns that it may harm humans or property, then good idea to remove it.	1	
I do not wish for removal of this tree due to the magnificent asthetics and bird life habitat. I do agree to dangerous branches being lopped only		1
I do not believe a healthy tree should be removed because it 'may' cause a problem in the future		1
Please, please do not remove. It is one of fre mature trees on Munro Road. It provides much needed shade for walkers includingschool children enrout to the primary school. Removal would also, I believe, reduce property values		1
Removal of this magnificent specimen would be an act of vandalism. It is pruned regulary and is one of too few street trees on either side of that stretch of Munro Street. We walk under it several times a week and have felt unsafe		1

Please remove the tree as it has dropped several large branches over the past 12 months which is very dangerous. In one incident, it blocked off Munro Road access all together. Thank you.	1	
Lovely tree but threatening location as falling branches may cause issues for footpath users	1	
Reasons why we do not agree: 1. Applecross is a tree-lined suburb. The tree in question is healthy and shady. If any branches need to be lopped off, we (as a community) will advise council 2. People who buy houses in this suburb should be prepared to deal with the falling leaves in their homes. If the decision is made not to cut down the tree, please erect a fence (barriers) around the tree to protect it from being poisoned.		1
It is a beautiful tree, mixed in with the other verge trees. It needs to be inspected yearly and pruned as necessary. We need all the trees we can keep in Applecross.		1
We agree to the flame tree being trimmed to reduce the risk of it being dangerous but not to it being removed		1
Even though we have marked "agree" we hope the homeowners have carefully considered their reasons for wanting to cut down this tree. It provides a home/food source for many birds and insects and cutting it down should be the last resort. It is one of the prettiest trees in the area as well and provides much needed shade in summer.	1	
I do not agree with the removal of this tree. Maintenance of the tree will provide enough safety for the house owners and public.		1
Prehaps it could be replaced with a Jacaranda tree	1	
04/05/2020 - I hate to see trees being cut down, specially those that have been growing for a longtime. But often trees are planted in the wrong place in ignorance, which I would say this one was. May I suggest large branches of the tree be offered to a tree-less suburb like burns beach, as it will grow quickly from branches. Thank you for consulting us neighbours  13/05/2020 - We were recently asked our opinion on the removal of the verge tree, an Erithrina, at 63 Ardross St, Applecross. I thought about this such a lot & eventually decided as those trees grow so quickly, perhaps it wouldnt matter to remove it but Im now unhappy about my decision and would like to reverse it - and say NO! It might be that you had an equal number of opinions so I decided to be in touch, in case it made your decision easier!		1
