

## Street Numbering

<b>Policy Type: Council Policy</b> <b>Policy Owner: Director Urban Planning</b>	<b>Policy No. CP- 068</b> <b>Last Review Date: 17 September 2019</b>
--	---

### Policy Objectives

The objectives of this policy are:

- To determine the allocation of street numbers to properties within the City of Melville in accordance with AS/NZS Standard 4819:2003: Geographic information – Rural and urban addressing;
- To ensure that all properties within the City of Melville are correctly addressed and are clearly identifiable;
- To provide a consistent approach to street numbering within the City of Melville;

To outline the circumstances whereby the City of Melville will consider the re-numbering of properties.

### Policy Scope

All new properties will be allocated street numbers at the time of development approval or subdivision (whichever is earlier).

On occasions, it may be necessary to adjust or modify existing address numbers to cater for the development or redevelopment of areas, particularly as a result of infill subdivision/development proposals. Under the provisions of the Local Law relating to Street Numbering the City may choose to proactively pursue a change of street numbers.

The provisions of this Policy apply to the numbering of new properties and the re-numbering of existing properties.

### Policy Statement

#### **1 Identification of Street Address**

- 1.1 Properties will be allocated a street number within the street from which the primary access to the property is gained.

#### **2 Allocation of Street Numbers**

- 2.1 The allocation of street numbers is to be undertaken in accordance with AS/NZS Standard 4819:2003: Geographic information – Rural and urban (as amended).

2.2 In addition to the above AS/NZS Standard, the City of Melville will allocate street numbers as follows:

- In accordance with a logical sequence of numbers along the street.
- One street number will be allocated per lot; however additional numbers will be allocated to lots which under the current planning provisions are capable of being developed to contain more than one property.
- In respect of corner lots, two street numbers will be allocated, one from each of the streets that flank the lot. In the absence of an approval for a dwelling on a vacant lot, the number initially allocated to a corner lot will be determined by the street with the smaller frontage. Where an approval is granted for a dwelling which has its primary street frontage to the longer boundary the City will renumber the property.
- The City reserves the right not to apply a suffix where this would result in an illogical series of numbers or impedes the ability of a corner lot to reorient in the future.
- Every lot will be allocated a street number, including reserves.
- Where a battleaxe subdivision or strata subdivision with a common property access leg (or similar) is proposed, the front lot is to be allocated the lower number, regardless of the location of the access leg.
- Hotel style numbering will be applied for apartment development of three storeys and above as per the Australian Standards.

The following examples are provided in accordance with 2.1 and 2.2 above. The images are indicative only.

**Side by Side Subdivision – house demolished**

**Side by Side Subdivision – house retained**

**Battleaxe Subdivision – house retained**

**Battleaxe Subdivision – house demolished**

### Battleaxe Subdivision – house demolished

### Battleaxe Subdivision – house retained

### Corner lot subdivision

## 3 Renumbering of existing properties

3.1.1 The City will consider a request for a change in street number or will initiate renumbering of properties in the following circumstances:

- To achieve a logical sequence of street numbering within the street;
- In response to difficulties associated with the identification of a property;
- Where the ability remains to accommodate the future allocation of numbers to properties where development potential exists; and
- Where the change is in accordance with AS/NZS: Geographic information – Rural and urban addressing.

3.1.2 The consideration of a request for renumbering of existing properties is to be undertaken in accordance with Clauses 1.1, 2.1 and 2.2 above.

3.2 The City will resist requests for street re-numbering:

- Where the existing allocated street number is considered to be 'unlucky';
- For religious reasons;
- To improve the feng shui of a property;
- For personal preference;
- Where the existing street number is considered to be 'not good for business';
- Where the property is difficult to sell;
- Where the number is considered to devalue the property;
- Where the request is contrary to the provisions of this policy.

#### 4 Consultation

- 4.1 Where the City initiates the re-numbering of existing properties or the City receives an application for renumbering which may impact upon properties other than the Applicant's property, the City will undertake consultation with the owners of the affected properties for a period of not less than 14 days prior to making a determination.
- 4.2 Any submissions received will be taken into account in the determination of the application, however the City is not obliged to support the views contained within the submissions and the determination of the application is to be consistent with the objectives of the policy.
- 4.3 The requirements of the LPP1.1 Planning Process and Decision Making policy shall apply to street numbering applications.
